

Blog post ideas

Social media

- Tumblr
- Insta
- Twitter

Needed for blog

On local host (because we didn't learn how to do that outside of local host)

Home page (all posts)

- Each post needs an edit and delete button
- Edit brings up all editable fields (time is not editable because it will show either when post was created or last edited)
- Post creation form
- Optional: sorter

Post

- Blog creator
- Creation time
 - This is JS (not editable)
- Blog title
- Blog contents

Basic folder set up

Public

- Css
 - Use express file
- Js for the new post button and filtering

Private

- Ejs (basically the html files)
 - Index
 - All posts
 - Add posts
 - Header (?)
 - Basic header
 - Footer (?)
- Js files
